

Ecology Insight

An essential tool for Preliminary Ecological Appraisals

Groundsure's Ecology Insight provides a comprehensive ecological baseline for any site, designed to support desk study preparation and Preliminary Ecological Appraisals (PEAs).

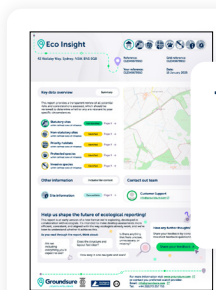

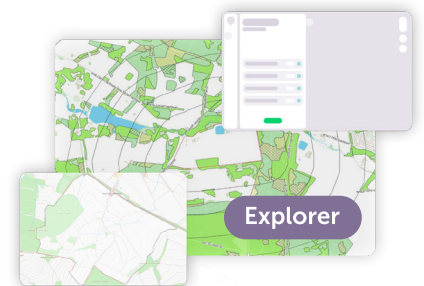

Key datasets

Built on 41 carefully selected ecological datasets and organised through seven themed chapters:

-  Statutory sites
-  Non-Statutory sites
-  Recorded habitats
-  Priority species
-  Invasive species
-  Site information
-  Site history

Key features and benefits

- **Seamless digital report navigation** through a structured layout and hyperlinked navigation bar, making it easier to move between chapters and supporting information;
- **Focused search-area insights** that summarise relevant data clearly and concisely;
- **Visual, evidence-led outputs** using maps, dynamic legends and data tables to highlight key datasets, improve interpretation and support faster decision-making;
- **Direct access to Groundsure Explorer where you'll get:**
 - Access to Groundsure Explorer to analyse sites using up to 170 years of historic mapping, ecological data, and collaborative tools for annotation, tagging and data integration.
